# chinese ARCHITECTURE

**CITIES IN TEXAS** have experienced tremendous booms with further growth projected. In the year 2030, population for the counties that make up the Texas Urban Triangle (including Houston, Dallas, Austin, and San Antonio) is projected to exceed 23 million, of the 31.8 million for the entire state. Cities across Texas can learn from China's recent attempts to accommodate new buildings within the existing fabric of its global cities.

The lecture series will feature a U.S. scholar and three successful Chinese architects who have reacted to China's growth in three of its most important cities:

Beijing, Shanghai, and Hangzhou.
